INDUSTRY

BIRD AVERY

ANIMAL ENCLOSURE

Netting

Netting is the ideal solution for enclosing bird cages, hen runs, rabbit hutches and for protecting young plants as well as protecting live stock from jackals. Netting is also used for gabions and the top half of tennis courts.

Netting can be used for all your “decorative” ideas.

Wide Range

Two finishes (lightly galvanized and fully galvanized)
Varying sizes of wire, mesh, heights and packaging

Easy Installation

Flexible wire, easy to unroll.
Possibility of burying under ground level.
Holds its shape.

Animal Safe

The product is designed with animals in mind affording few places where they can cut themselves.

Numerous Applications

Construction, temporary fencing, Agricultural encampments.

Finish	Mesh (mm)	Fence Height (mm)	Ø Wire (mm)	Packaging
Lightly Galvanised	13	600	0.71	Rolls come in 5m 10m & 50m lengths
	25	900	0.90	
	50	1200	1.00	
	75	1500	1.80	
	90	1800
